

**ULTRASOUND SOLUTIONS is pleased to present  
Dr. MARTIN R. CHAVEZ,  
Chief of Maternal Fetal Medicine and Fetal Surgery  
at NYU Winthrop Hospital, for an amazing look at  
exciting new frontiers in  
Ultrasound-Assisted Fetal Surgery.**

**It's LOCAL!!! It's CONVENIENT!!!**  
**It's FREE!!!**

**Topic: Ultrasound Assisted Fetal Surgery (Approved for 1.0 SDMS CME credit)**

**Description:**

Dealing with complex pregnancies is a significant challenge. This 1 hour event will provide participants with a greater understanding of the role of ultrasound imaging as it is used to assist Obstetricians and Perinatologists in the management of the fetus during life-promoting surgical procedures. The latest pioneering advances in fetal surgery will be discussed.

**Course Objectives:**

Upon completion of this educational activity, the participant will be able to:

- Describe the types of fetal pathologies that warrant ultrasound-assisted in-utero therapeutic/surgical intervention prior to delivery
- Discuss the manner that ultrasound-assisted fetal therapeutic/surgical interventions are accomplished

**About Our Speaker:**

Martin R. Chavez, MD, leads NYU Winthrop Hospital's team of Maternal-Fetal Medicine specialists and serves as its Chief of Maternal Fetal Medicine and Fetal Surgery. He has extensive expertise in high-risk pregnancies, ultrasound diagnosis, ultrasound-guided procedures, and fetal surgery. Dr. Chavez and his staff are renowned experts in the management of complicated pregnancies. Their busy Ultrasound Unit performs over 29,000 ultrasounds annually at 13 locations.

One of the innovative programs started by Dr. Chavez is the Fetal Evaluation and Treatment Team. It offers fetal surgery options for pregnancies which could benefit from in-utero treatment in an effort to allow the fetus to continue developing safely in the mother's womb so it can reach a later gestational age before delivery. Such cases may involve a multi-disciplinary approach from several departments across the hospital to optimize outcomes.

Areas of research interest for Dr. Chavez include improving ultrasound techniques to better determine gestational age, as well as, developing advancements in fetal procedures. He is the principal investigator at NYU Winthrop Hospital for cutting-edge ultrasound technologies, which allow for detection of patients at risk for preterm delivery. He is also working on implementation of artificial intelligence for the identification of normal and abnormal fetal ultrasound. In addition, Dr. Chavez has participated in clinical trials obtaining samples that allowed for enhanced recognition of cell free DNA and biomarkers for pre-eclampsia.

**When & Where:**

**Wednesday, February 26, 2020**

6:15 - 7:00 PM **Meet & Greet** - A light dinner and refreshments will be provided.

7:00 - 8:00 PM **Presentation** - Dr. Chavez will begin promptly at 7:00 PM.

This event will be held at Ultrasound Solutions Corp.'s new state-of-the-art facility in Ronkonkoma, NY. We are conveniently located off either the Long Island Expressway or Sunrise Highway at:

**123 Comac Street**  
**Ronkonkoma, NY 11779**  
**800-773-4582**

(White building at the northwest corner of Comac Street and 9th Avenue. The building entrance faces 9th Avenue. Additional parking is available in the rear of the building.)

**This activity has been approved for 1.0 SDMS CME credit.  
The CME participant roster will be reported by Ultrasound Solutions Corp. to the  
SDMS CME Tracker System.**
